200 MARKETS
Trust from Customers Across More than 200 Markets

Zhongce Rubber Group Co., Ltd (ZC-Rubber) is a global tyre company based in Hangzhou, China and was founded in 1958. Over our more than 60 years of history, we experienced continuous growth in quality and reputation to become the Top 10 tyre manufacturer worldwide today.

Our engineers with our international R&D team focus on constant technological development and innovation spending millions of US dollars in research and development each year and upgrading our production and testing facilities. The ET Industrial Brain in the production process promises our smart production and guarantee tyres with high quality, safety, and value with maximum efficiency.

We have formed an extensive global service network of about 1,200 distributors with 250,000 sales locations in 160 countries. Our subsidiaries in Thailand, Germany, Brazil, and the United States serve customers without any difference in time and language. We are dedicated to better support our suppliers, distributors, and customers through a one-stop service.

Safe and Value are always the key of our company. We take pride in the superior quality of our tyre products and the first-rate services. We are still endeavoring to become one of the most respected tyre manufacturers globally and craft a better future with all partners and friends.

SPORT RS

Benefits and Features

- Ideal drifting tyre with special design and components based on competition experiences
- Asymmetric tread design with big pattern blocks and special compound provides superior grip ability
- Continuous center rib generates better grip in dry conditions and enhances high-speed stability

TALOS T-017 **ZRT**

Benefits and Features

ZC Rubber RunFlat Tyres (**ZRT**)

ADVANCED CARCASS STRUCTURE

Enhance the tyre body and avoid possible tyre failure during low pressure driving

SPECIAL REINFORCED SIDEWALL CONSTRUCTION

Supporting the tyres even if the air pressure dropped to zero

ZC Rubber first generation RunFlat tyres with extraordinary performance in low air pressure situation

Hybrid Silane
(Driving Comfort)

Hybrid Formula
(Strong Grip)

BPOT Technology
(Improved Durability)

TALOS T-017

Benefits and Features

Variable-pitch noise-reduction pattern blocks, sound-bolts in 4 circumferential grooves, and the staggered arrangement of inner and outer lateral grooves to provide consumers with a more comfortable driving experience

Hybrid Silane patent to optimize the tread compound and absorb road vibration effectively to further improved consumer's driving and experience

The patented Nanometer Mixing-Technology and High saturation pattern design, provide tyres with better wear resistance and increased mileage

Driving Comfort

Hybrid Silane™ to optimize tread rubber compound Soft Tread Compound and Minimized Vibration

Strong Grip

Hybrid Formula™ - Super hybrid rubber compound Fast water drainage and strong grip

Improved Durability

Nanometer Mixing-Technology™ for longer mileage

SPORT SA-37

Benefits and Features

- New generation of asymmetric ultra high performance tyre for summer
- SILICA TECH compound helps to enhance wet grip providing shorter braking distance
- Strong center rib guarantees excellent handling on both wet and dry roads and on-center feel

• Made in China • Made in Thailand

ZUPERACE SA-57

Benefits and Features

- New generation of directional Ultra High Performance tyre
- Circumferential V-grooves ensure outstanding water drainage
- Strong center ribs provides remarkable handling while steering
- Improved SILICA compounding enhance the wet and dry grip

● Made in China ● Made in Thailand

TRITON T-127

Benefits and Features

- High-performance passenger tyre with superior handling and lower rolling resistance
- The rational siping design and uniform footprint pressure provide a more comfortable driving experience and higher mileage performance
- The variable pitch tread design helps minimize the impact on the road surface, resulting in a more comfortable ride
- The lateral groove with chamfer increases the friction force of the blocks, improving braking performance

Made in Thailand

Rim Size	13 - 19
Series	45 - 80
Speed Rating	T - W

TRITON T-118

Benefits and Features

- High comfort touring tyre with a quiet and smooth ride
- Improved tyre structure guarantees stable handling and cornering
- Five strong tread ribs enhanced steering precision and mileage
- Variable pitch tread design helps reduce noise

Rim Size	13 - 20
Series	35 - 80
Speed Rating	T - W

TALOS T-017 SUV

Benefits and Features

Variable-pitch noise-reduction pattern blocks, sound-bolts in 4 circumferential grooves, and the staggered arrangement of inner and outer lateral grooves to provide consumers with a more comfortable driving experience.

Hybrid Silane patent to optimize the tread compound and absorb road vibration effectively to further improved consumer's driving and experience

The patented Nanometer Mixing-Technology and High saturation pattern design, provide tires with better wear resistance and increased mileage.

Improved Durability

Nanometer Mixing-Technology™ for longer mileage

Driving Comfort

Hybrid Silane™ to optimize tread rubber compound
Soft Tread Compound and Minimized Vibration

Strong Grip

Hybrid Formula™- Super hybrid rubber compound Fast water drainage and strong grip

ZUPER TREK Z-203

Benefits and Features

- Optimized casing construction ensure a comfort ride
- Four straight tread grooves guarantee excellent water drainage
- Multi siping design provides outstanding traction on various road surface
- improved footprint promises less fuel consumption and remarkable tyre life

Rim Size	16 - 22

Made in Thailand

SU318 H/T

Benefits and Features

- Ideal H/T tyre integrated outstanding on-road comfort and wet traction safety as a whole
- Four longitude grooves combined with wind sipes ensure excellent water evacuation and wet traction performance
- SILICA TECH adopted for better wet grip as well as low rolling resistance
- Re-constructed steel bead wire improves driving comfort effectively

SL369 A/T

Benefits and Features

- Wide tread and multi-stepped grooves increase surface area of tread to enhance traction on both on and off roads
- Zig-zag grooves offers efficient water drainage and enhanced traction on wet road
- Large tread blocks help enhanced stability and handling with less noise on highway
- Aggressive sidewall protectors increase off-road bite and prevent damage from sidewall cut and abrasions

● Made in China ● Made in Thailand ● OWL Outline White Letters (OWL)

TERRA LEGEND SL399

Benefits and Features

- Wider tread design and new compound help longer tread life On & Off road
- Side-Biter lugs in the sidewall improve traction in mud and rough road
- Aggressive sidewall design provide increased traction, especially in aired-down driving situations

● Made in China ● Made in Thailand

RUGGED LEGEND SL339

Benefits and Features

- Optimized tread design with wide tread large block and variable pitch pattern
- Two-wide circumferential zigzag grooves and Center cross pattern grooves with stone ejectors Provide superb off-road traction throughout the tyre's wear life with stone ejectors to help prevent stone drilling
- Aggressive sidewall design offer customization with a distinct look on each side of the tyre
- Open shoulder design and wide lateral grooves ensure excellent driving performance of the tyre

Made in Thailand

MUD LEGEND SL366

Benefits and Features

- Especially designed for unpaved tough roads (Professional off-road tyres)
- Various shoulder blocks promote driving and handling performance on tough roads
- Perfect grip on tough surfaces such as mud and sand

Made in China

MUD LEGEND SL376

Benefits and Features

- New generation premium tyres designed for unpaved tough road (professional off-road tyre)
- Aggressive and open shoulder design provides extreme grips for various terrains
- Stone rejectors protect the tyre casing and minimize stone drilling for long-lasting off-road experience

Made in Thailand

MUD LEGEND SL378

Benefits and Features

- The aggressive tread design is engineered to provide strong biting edges.
- The staggered, off-center tread blocks provide increased traction while enhancing road performance.
- Built to handle rugged terrains anywhere and to take you on extreme adventures
- Robust shoulder design helps to minimizing cuts

Made in China

TRAC LEGEND SL315

Benefits and Features

- 4 Zig-zag grooves and the snow sipes improves all-season performance
- The interblock tie-bar at the centre ribs improve steering response
- Double-ply casing and double steel belts construction guarantee a outstanding load capacity and durability performance

Rim Size	15 - 18

SL309

Benefits and Features

- All-season tread design with long tread life
- Double-ply casing construction handles heavy loads at highway speed and delivers outstanding durability
- Double steel belts plies and double full jointless nylon cap plies improve handling stability and durability
- Wide circumferential grooves helps to evacuate water quickly and efficiently

Made in Thailand

H188

Benefits and Features

- Valuable commercial light truck tyre for vehicles on paved roads
- 3 rib grooves provides improved handling and comfort
- Polyester tyre casing with steel belts for good durability

Rim Size	12 - 16
Series	60 - 75
Speed Rating	Q - H

 ● Made in Thailand
 WSW White SideWall (WSW)

ST313

Benefits and Features

- Applicable for mini-bus, van and commercial light trucks
- Strong sidewall design enables high durability and fights off cuts and abrasion in city roads
- Triply polyester belts plies creates strength bearing heavy loads with superior stability

Rim Size	15 - 16
Series	75 - 85
Speed Rating	L - R

Zuper Snow Z-507

Benefits and Features

- Asymmetric pattern design provides superior handling on snow surface
- Optimised lateral groove angle offers strong snow performance
- Special zigzag traction sipes improves traction and braking performance on snow roads

M+S

Rim Size	16 - 20
Series	35 - 70

Made in China

SW608

SW608

Benefits and Features

- V-shaped tread design works with high-drainage groove to drain snow, slush and water quickly
- Optimized direction of sipes maximize the tyre's contact with the road surface and delivers outstanding traction and control in all winter driving conditions
- Special winter tread compound offers performance driving

Made in China

SW628

Benefits and Features

- Asymmetric pattern design provides superior handling on snow surface
- Deeper tread grooves and sipes design helps to maintain a strong traction performance in extreme road condition
- Silica-enhanced tread compound keeps rubber flexible for maximum performance in extreme cold temperatures in winter

Rim Size	14 - 22
Series	35 - 75
Speed Rating	T - V

Made in China

SW618

Benefits and Features

- Premium studless winter tyre providing excellent snow, slush and wet traction in cold climates
- Special pattern design to promote aggressive bite in deep snow and wet road conditions
- Superior tread compound keeps rubber flexible for maximum performance in extreme cold temperatures in winter

Rim Size	13 - 20
Series	30 - 70

TYRE SIZE KNOWLEDGE

SIDEWALL INSTRUCTION

OTHER MARKINGS

- P** as part of the tyre size designation (e.g., P205/65R15) used to indicate tyres intended for services on passenger cars.
- LT** as part of the size designation (e.g., LT235/75R15) used to indicate the tyres are intended for light truck vehicles.
- M&S** letters used to indicate a tyre suitable for Mud and Snow and/or All Season usage.
- XL** as part of the size designation (e.g., P235/75R16 XL) used to indicate the tyre can carry more loads as the maximum inflation pressure and load are greater than a standard load version. (Also could be called REINFORCED or RF).
- ZR** as part of the tyre size designation (e.g. 225/45ZR17 XL) used to indicate the tyre has a maximum speed over 240 kilometer per hour.

TYRE UPGRADE

"Tyre Upgrade" means: increase of rim diameter without changing of tyre overall diameter, the trend in development of low aspect ratio is called upgrade.

INCREASE OF SPORTY PERFORMANCE

The tyre response will be more sensitive when you turn the steering wheel that the flex of tyre will be reduced, and the performance of steering and handling stability will be better, especially under medium and high speed driving.

ENHANCEMENT OF BRAKING ABILITY

The braking stability will be improved due to the decrease of tyre flex when you brake.

Please refer to the clarifications set forth below to upgrade the tyre:

- Without any particular reason, please do not change the overall diameter of tyre easily. The alternation of tyre overall diameter will cause misreading of speedometer or mutual interference between tyre and other parts of vehicle.
- Please determine the width of tyre in accordance with the specific width of vehicle. If the width of the entyre tyre is increased overly, it will cause mutual interference between tyre and other parts of vehicle, even heading out of the tyre from bodywork which will initiate danger.
- Notice the load index of vehicle when you upgrade the tyre. There is rule to the weight which the tyre can bear (load index) for each size. Please refer to the load index when you chose the proper size.

Under the condition of keeping general the same of tyre overall diameter, the tyre can be upgraded to:

TYRE ROTATION AND INFLATION

TYRE ROTATION

The purpose for rotating tyres is to achieve a more uniform wear for all tyres on a vehicle. Before rotating tyres, determine the cause of any unusual wear and correct any misalignment, imbalance, or other mechanical problems.

Otherwise it will cause: **1.** Ride disturbing; **2.** More noise; **3.** Poor ride comfort; **4.** Shorter of life span.

Note: it is suggested that tyres should be transposed as soon as the phenomena above mentioned are detected (especially the two front wheels).

The tyre transposition patterns are acceptable below. Please refer to your vehicle owner's manual regarding tyre transposition advice.

TYRE INFLATION

One of the most important aspects of tyre maintenance is proper inflation.

Sufficient inflation is needed to carry the load and avoid damage. Driving with improper inflation (particularly grossly under inflated or over inflated tyres) is dangerous and can cause critical damage or sudden failure of the tyre(s). Proper inflation should be maintained and check on at least weekly bases and before long distance drives.

Proper inflation should be maintained and checked at least once a week and before a long distance drive.

It is also advisable to take into account axle load and driving conditions when setting inflation pressure. Compensation for heavier loads can be made by increasing inflation pressure, but do not exceed maximum inflation for the tyre or maximum axle load.

In the space of just one month, a tyre can lose 10 pounds of air pressure.

It is important to check your air pressure regularly, to make sure your tyres are neither under nor over inflated.

Under-inflation

Is the worst enemy your tyre can have. It causes increased treadwear on the outside edges (or shoulders)of the tyre. It

also generates excessive heat, which reduces tyre durability. Finally it reduces your fuel economy by increasing rolling resistance-soft tyres make your vehicle work harder.

Over-inflation

Is also detrimental to the tyre. Too much air pressure causes the center of the tread to bear the majority of the truck's weight, which leads to faster deterioration and uneven wear. Any kind of uneven wear will shorten the lifespan of your tyres.

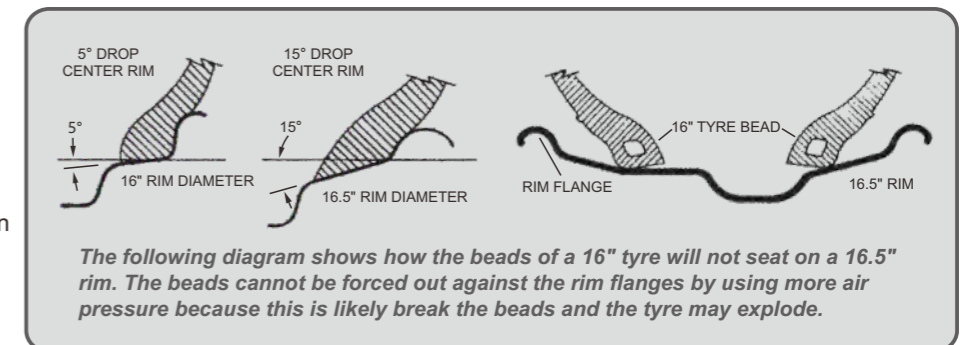

MOUNTING PROCEDURE

There is extreme danger in attempting to install a tyre of one rim diameter on a rim of a different rim diameter.

Always replace a tyre on a rim with another tyre of exactly the same diameter tyre designation and suffix letters.

For example, a 16" tyre goes with a 16" rim. Never mount a 16" size diameter tyre on a 16.5" rim. While it is possible to pass a 16" diameter tyre over the lip or flange of a 16.5" size diameter rim, it cannot be inflated enough to position itself against the rim flange. If an attempt is made to seat the tyre bead by inflating, the tyre bead may break with explosive force and could cause serious bodily injury or death.

Rims of different diameters and tapers cannot be interchanged. The top right diagrams illustrate the difference between rims of two different tapers and diameters.

FOR YOUR SAFETY AND COMFORT

Any tyre, no matter how well constructed, may fail in use as a result of punctures, impact damage, improper inflation or other conditions resulting from use.

Tyre failure may create risk of properly damage or personal injury. To reduce the risk of tyre failure and for your safety and comfort, we strongly recommend the following:

- Never mount a tyre on a rim that is damaged or which has been repaired by welding or brazing.

- Never inflate beyond 275 kPa (2.75bar, 40psi) to seat beads.
- Tyre inflation should be done in a safety cage.
- Do not mix different tyre size designations or construction on the same axle, except for limited use of temporary spare tyres.
- Outer diameter of wheel should be the same as inner diameter of tyre.
- Make sure to follow instructions in the car owner's manual or on the vehicle tyre information placard in the car to maintain proper tyre pressure (Particularly driving on highway and/or when carrying heavy loads).
- Never bleed or reduce air pressure when tyres are hot from driving.
- Over- or under-inflation pressure (including spare tyre) at least once a month and before every long trip.
- Stones, gravel and other outer objects stuck in the tyre treads may damage the tyre. Remove outer objects from the tyre treads.
- Tyre should only be mounted by professionally trained persons.
- Objects in the road such as potholes, glass, metal, rocks, wood debris, curbstones and such, which could damage a tyre should be safely avoided.
- To preserve traffic safety and tyre life, ZC rubber recommends driving safely and avoiding hard acceleration, braking or cornering in unnecessary situations.
- If you feel the car is unstable or feel any unusual noises or vibrations, stop your car in safe place and inspect your tyres. Even if no visible defects are found, drive slowly and ask your dealer to inspect your tyres as soon as possible.
- Winter tyres (studless, stud or snow tyres) should not be mixed with other types of tyres.
- New winter tyre should not be driven over 80km/h for the first 100km.
- When driving on winter roads, sudden starts and quick stops should be avoid and a safe car-to-car driving distance should be maintained.
- When using tyre chains be sure to use the proper size chains and affix with priority to the drive axle.
- Avoid driving with tyre chains for long distance on roads with no packed snow or ice.

Never use a tyre under the following conditions and replace tyres immediately:

- If the tread has worn to the tread wear indicator.
- If breaks in the fabric appear.
- If cords or wires are exposed.

Storage of steel belted radial tyres:

- Keep your tyres away from direct sunlight and locations with high temperature, high moisture, heavy electrical machinery, welders etc.
- Tyres should be preferably stored in a cool, dry, and dark room with controlled environment.

To preserve traffic safety, ZC rubber recommends driving substantially slower under adverse weather or road conditions.

ROUTINE MAINTENANCE

- Each month the tyre pressure should be checked one time at least when the tyre is cool, too much or less of the pressure will cause damage to tyre.
- Please take a 15-minutes break after driving on expressway for two hours.
- Please ensure that there are no nails, metal pieces, glass or other foreign materials.
- Please ensure that there is no damage such as separation, distortion and distinct rusting which will cause air leakage.
- Please transpose the tyres regularly (approximately 5000 km) in accordance with abrasion conditions for the sake of expanding its life span and preventing eccentric wear.
- No tyre brightener.

THE INVENTORY OF STEEL-CORD RADIAL TYRE

The tyre should be placed in dry interior.

Note: In order to ensure the driving safety, we suggest that please decrease the speed while driving under atrocious weather and poor terrain condition.
